EDUCATION

The University of Texas at Arlington
Bachelor of Science in Computer Information Systems

May 2026

EXPERIENCE

Incoming Information Systems Analyst

Lockheed Martin

Fort Worth, TX

AI Evaluation Analyst (Contract)

Mercor

August 2025 – January 2026

Remote

- Evaluated and analyzed multimodal AI datasets (image, audio, and video) to conduct structured Quality Assurance (QA), validating model alignment, performance, and response accuracy against established business requirements.

Business Systems Analyst

Alpha Events and Decor

January 2023 – Present

Dallas, TX

- Led requirements gathering sessions with a diverse user base of **200+** individuals, including wedding, social, corporate event planners, employees and owners to define functional specifications for a multi-user customer portal
- Authored Product Requirements Documents (PRD) and Business Requirements Documents (BRD), translating high-level business needs into context diagrams, business process flows, and user stories to bridge the gap between executive vision and technical execution.
- Facilitated technical "deep-dives" with developers to refine technical specifications, evaluate design concepts, perform complex data mapping exercises, and collaborate with QA testers to test the product.

PROJECTS

Internal IT Ticketing System | Systems Analyst

February 2026 – May 2026

- Collaborated with a 5-member team to design and prototype a React-based internal IT ticketing system with centralized ticket tracking, approvals, notifications, and role-based access control.

MavGrades.com | Product Manager

July 2024 – May 2026

- Led strategy, planning, and execution of a university-wide grade analytics platform used by **25,000+ students** to improve academic decision-making.
- Translated user needs into scalable solutions through stakeholder collaboration and Agile delivery.
- Delivered front-end features with Next.js and Tailwind CSS, increasing user engagement by **35%**

Jurassic Parking

March 2025 – June 2025

- Developed an AI-powered parking optimization solution utilizing **YOLOv8** and **TensorFlow** to analyze real-time parking availability and improve operational efficiency.
- Led a team of 3 engineers in processing and analyzing **8,000+** image datasets to improve detection accuracy and reduce parking search time.

LEADERSHIP

Executive Director

Association for Computing Machinery

January 2024 – May 2026

Arlington, TX

- Led strategic technology, outreach, and community initiatives for a **500+** member organization, coordinating cross-functional teams and driving data-driven strategies that generated **8M+** social media impressions.

TECHNICAL & ANALYTICAL SKILLS

Core Methodologies & Analysis: Agile (Scrum/Kanban), SAFe, Waterfall, SDLC, ADLC, BRD & PRD
Authoring, User Stories, Process Mapping, Gap, Risk and Data Analysis, Testing/QA

Technical Stack & Frameworks: Python, JavaScript, SQL, Swift, C/C++, HTML/CSS, React, Next.js, Node.js, Flutter, Tailwind CSS, REST APIs

Databases, Cloud & Tools: MySQL, SQLite, Firebase, Vercel, Jira, Confluence, Figma, Git, Visual Studio, Wiki, MS Office Suite, Google Workspace
